Professional profile

An enthusiastic and professional Programmer, who enjoys being part of leading, successful and productive team. I'm quick to grasp new ideas and concepts, and can develop innovative and creative solutions to problems. Able to work well on own initiative and can demonstrate the high levels of motivation required to meet the tightest of deadlines. Even under significant pressure, possesses a strong ability to perform effectively.

Objective

Now looking to build on extensive range of technical skills within a suitably challenging role. Keen to achieve further professional development. Willing to get my hands on new Technologies like NodeJS, Redis, Java, ReactJS etc.

Technical Summary

- **Languages, technologies & Methodologies:** php(core), php(oop), **Laravel**, **React(advanced)**, **Redux**, java(core), CodeIgniter, JavaScript, **MySQL**, XML, **jQuery**, AngularJS(newbie), AJAX, **GraphQL**, **SSO(Single Sign On)**, building REST api, SOAP api, Scaling Large PHP Applications, Normalizing Database, HTML5, CSS3, Backbone.js, Node.js(newbie) and many apis(twitter, google+, youtube, facebook, instagram, weather, deviantart, soundcloud, vk & more.) etc.
- **Operating Systems:** Linux (CentOS 6.x, Ubuntu 14/15/16), Windows XP/7/8/10.
- **Tools & Other:** Netbeans 8.0, VSCode, Sublime, Twitter Bootstrap, LAMP, WAMP, Rabbit SVN, Microsoft Office, Libre Office, Postman, jMeter etc.

Selected portfolio

- **Xhibit Signage** - Cloud based digital signage system - CodeIgniter based large application with 50+ API's used. SOAP/REST web services enabled. 20+ JavaScript libraries used, fully AJAX driven, built with power of HTML5 and CSS3. Ip location, Google map, weather, sports, flight states, stock, timer, social media etc many more API's used for backend.

- **Inventory** - A cloud based online inventory management system created using React and Redux (Global state/data management for the project on the client side) for frontend & Laravel for backend which also integrates with your existing Accounting systems like Quickbooks Online very well and I have done the Quickbooks integration portion for the system.
- **Motherclock** - A web based payroll system which basically provides payroll functionalities. Frontend part of the application is created using the React.
- **Timewise** - A web based portal for appointment and ecommerce(minial) developed with React using Rich components like chartjs(react-chartjs-2) & many others but Application under active development and it's using React/Redux on frontend and Laravel for backend.
- **Bluebird** (under active development) - An indonesia based taxi service portal for internal use only developed using React and using rich components like Map (React-leaflet) & more others.
- I also have build few stuffs on github for learning purpose you can go to my github page <https://github.com/mukeshtivari> or on my website which i have implemented using GitHub Pages, thank you GitHub.

Strengths

- Self-development, self-motivated, communication, interpersonal and problem solving skills.
- High level of required confidence and determination.
- Adaptability to different environments and quick learning capabilities.
- Team work, flexible, punctual and interest to learn new technologies, methodologies and trends.
- Meeting deadline even under significant pressure.
- Discuss project requirements and provide alternatives & suggestion.
- Obsessed in making things better even more better.

Gender	Male
Nationality	Indian
Known Languages	Gujarati, Hindi, English
Marital Status	Unmarried

Interests and activities

Currently include Photography, Exploring natural places, hacking, reading blogs about tech.

Experience

July 2015 - April 2017

Programmer at Mvix USA, Surat

- I was working as a programmer in CMS (developed using codeigniter). My task involves like Working on WIdgets, Optimizing views (front end part), reducing server load by minimizing requests, Reduced code execution through refactoring, code analysis and database optimization. I do optimization and scaling of PHP code structure for better and fast performance. I work on front-end also with jQuery and AngularJS.
- After just 15 days of joining the company, I had bypassed the login mechanism for the CMS which the company was using since 2001 (undetected) and also reported many issue related to enhancing the website security like cookie hijacking, improper password reset policy and many more.
- I also deal with the other security & performance concern and review the code of peers for final submission or commit.

May 2017 - Now

Programmer at Crest Infosystems Pvt. Ltd., Surat

- I am working as a full stack developer and using tech like **React** (JavaScript library provided by facebook) for front end and **Laravel** (most popular & secure php framework developed by Taylor Otwell) also sometime use **Node.js** (JavaScript using Chrome's V8 JavaScript engine on server) depending upon project preferences.
